

# VIRGINIA AGRICULTURAL BEST MANAGEMENT PRACTICE TAX CREDIT PROGRAM

## Overview

The goal of the Agricultural (Ag.) Best Management Practices (BMP) Tax Credit Program (TCP) is to encourage voluntary installation of BMPs that address Virginia's nonpoint source pollution water quality objectives. As with any tax credit usage the taxpayer is ultimately responsible for determining that they are eligible to utilize the tax credit in compliance with instructions and regulations from the Virginia Department of Taxation. Participation in Virginia's agricultural cost-share and/or tax credit programs does not convey the public's right to access the participant's property. The current Virginia Agricultural Best Management Practice Tax Credit is twenty-five percent (25%) of the total eligible cost not to exceed \$17,500.00. If a cooperator receives a cost-share payment, only the cooperators share of the project (his out of pocket expense) is used to determine the amount of the tax credit.

The Agricultural BMP Tax Credit Program is managed and implemented with similar policies and procedures to the Agricultural BMP Cost-share Program. The Virginia Agricultural Best Management Practices Tax Credit Program shall operate following the guidelines of the agricultural BMP cost share program in general, except as otherwise expressly provided in this document. Implementers should follow all aspects of the Virginia Agricultural BMP Cost-Share Program (VACS) manual, unless specifically stated otherwise in these guidelines. This guidance is intended to address any differences between the two.

The applicable Code of Virginia Section as amended follows:

§ [58.1-339.3](#). Agricultural best management practices tax credit.

A. For all taxable years beginning on and after January 1, 1998, any individual who is engaged in agricultural production for market, or has equines that create needs for agricultural best management practices to reduce nonpoint source pollutants, and has in place a soil conservation plan approved by the local Soil And Water Conservation District (SWCD), shall be allowed a credit against the tax imposed by § [58.1-320](#) of an amount equaling 25 percent of the first \$70,000 expended for agricultural best management practices by the individual.

As used in this section, "agricultural best management practice" means a practice approved by the Virginia Soil and Water Conservation Board (VSWCB) which will provide a significant improvement to water quality in the state's streams and rivers and the Chesapeake Bay and is consistent with other state and federal programs that address agricultural, nonpoint-source-pollution management. Eligible practices shall include, but are not limited to, the following:

1. Livestock-waste and poultry-waste management;
2. Soil erosion control;
3. Nutrient and sediment filtration and detention;
4. Nutrient management; and
5. Pest management and pesticide handling.

A detailed list of the standards and criteria for practices eligible for credit shall be found in the most recently approved "Virginia Agricultural BMP Manual" published annually prior to July 1 by the Department of Conservation and Recreation.

B. Any practice approved by the local Soil and Water Conservation District Board shall be completed within the taxable year in which the credit is claimed. After the practice installation has been completed, the local SWCD Board shall certify the practice as approved and completed, and eligible for credit. The applicant shall forward the certification to the Department of Taxation on forms provided by the Department. The credit shall be allowed only for expenditures made by the taxpayer from funds of his own sources.

C. 1. The amount of such credit shall not exceed \$17,500 or the total amount of the tax imposed by this chapter, whichever is less, in the year the project was completed, as certified by the Board. Any taxpayer claiming a tax credit under this section shall not claim a credit under any similar Virginia law for costs related to the same eligible practices.

2. If the amount of the credit exceeds the taxpayer's liability for such taxable year, the excess may be refunded by the Tax Commissioner. Tax credits shall be refunded by the Tax Commissioner on behalf of the Commonwealth for 100 percent of face value. Tax credits shall be refunded within 90 days after the filing date of the income tax return on which the individual applies for the refund.

D. For purposes of this section, the amount of any credit attributable to agricultural best management practices by a pass-through entity such as a partnership, limited liability company, or electing small business corporation (S Corporation) shall be allocated to the individual partners, members, or shareholders in proportion to their ownership or interest in such entity.

E. A pass-through tax entity, such as a partnership, limited liability company or electing small business corporation (S corporation), may appoint a tax matters representative, who shall be a general partner, member-manager or shareholder, and register that representative with the Tax Commissioner. The Tax Commissioner shall be entitled to deal with the tax matters representative as representative of the taxpayers to whom credits have been allocated by the entity under this article with respect to those credits. In the event a pass-through tax entity allocates tax credits arising under this article to its partners, members or shareholders and the allocated credits shall be disallowed, in whole or in part, such that an assessment of additional tax against a taxpayer shall be made, the Tax Commissioner shall first make written demand for payment of any additional tax, together with interest and penalties, from the tax matters representative. In the event such payment demand is not satisfied, the Tax Commissioner shall proceed to collection against the taxpayers in accordance with the provisions of Chapter 18 (§ [58.1-1800](#) et seq.).

#### BMP Sign-up

Districts will conduct sign-up for the tax credit program on a continuous basis. Sign-up will be recorded in the Virginia Ag. BMP Tracking Program. **Applicants must have a District approved conservation plan to meet the Code requirements.** Other types of professionally developed conservation planning documents as appropriate and as itemized below are acceptable to meet this requirement. The conservation plan must include the implementation of the BMP that is eligible to receive a tax credit.

Technical information for the requested BMP including a total estimated cost, must be completed by the District before the request is submitted to the District Board for consideration. Each District should establish a local schedule and deadlines for BMP completion for the tax credit program to allow time for paper work and field work to be completed prior to the authorization of the Tax Credit. Since the Code language requires that the BMP be completed within the taxable year in which the tax credit is claimed it is important that Districts assure that the tax credit approved date and practice completion date entered into the Tracking Program occur within the same calendar (taxable year).

## Plan Requirements

Individuals wanting to participate in the Tax Credit Program must have a conservation plan approved by the local District Board of Directors prior to BMP installation. For the Tax Credit Program, the following types of conservation plans are acceptable as long as the plan includes the practice to be installed and an installation schedule for the specific practice.

- Soil Erosion Plans (NRCS standards, including plans for EQIP, WHIP, Food Security Act, Conservation Reserve Program)
- Nutrient Management Plans (DCR standards)
- Pest Management Plan (VCE standards)
- Department of Forestry Cost-Share Plan (VDOF standards)
- Ag Stewardship Plan (VDACS standards)
- Chesapeake Bay Preservation Act Plan for agricultural lands (DEQ standards)

Conservation plans should be written by an individual certified to write that type of conservation plan, and should meet current conservation planning standards. Comprehensive conservation planning for the tract is always encouraged. For those localities that are within the Chesapeake Bay Preservation Act area, agricultural lands as defined by a local governments....

“...shall have a soil and water quality conservation assessment conducted that evaluates the effectiveness of existing practices pertaining to soil erosion and sediment control, nutrient management, and management of pesticides, and, where necessary, results in a plan that outlines additional practices needed to ensure that water quality protection is being accomplished consistent with the Act and this chapter.” [Chesapeake Bay Preservation Area Designation and Management Regulations].

At a minimum, a conservation plan must contain the BMP and an implementation schedule for the specific field or site. A private planner, technical service provider or other professional conservation staff of an appropriate federal, state or local agency can prepare the plan.

## Pre-approval of Tax credits BMPs

Final approval of practices for tax credit is the responsibility of the local Soil and Water Conservation District Board of Directors. District Boards of Directors should approve BMPs for tax credits based on the total estimated cost of the BMP before installation. Any cost over runs that may impact the amount of the approved tax credit may be approved as a separate action after the BMP is certified.

## Definition of Applicants

All individuals engaged in the production of agricultural products for market or *owners of equines that create needs for agricultural best management practices to reduce non-point source pollutants (after January 1, 2007)* within the boundaries of the Commonwealth of Virginia are eligible to participate in the Virginia Agricultural BMP Tax Credit Program. When an individual operates land not within the jurisdiction of a Soil and Water Conservation District, the District that has the landowner's hydrologic unit listed in the Virginia Agricultural Best Management Practices Cost-share Program guidelines section of this manual will administer the program to the landowner.

Tax Credits are made to the applicant (by social security number or federal tax ID number) who signs the request form. An applicant can be a landowner, agent, or operator of record as long as the individual has control of the property. An applicant also means any corporation, association or partnership, or one or more individuals. Various companies, corporations, and partnership arrangements exist for farm ownership. Farm corporations (signing under Federal Tax Identification number) or partnerships operating under a farm name are classified as a single "applicant."

Lands located outside the state are not eligible; unless a portion of the field or site in need of treatment lies within Virginia's boundary, in which case the entire field or site in need of treatment is eligible.

## Pass-through Entity

§ [58.1-339.3](#).E. states that A pass-through tax entity, such as a partnership, limited liability company or electing small business corporation (S corporation), may appoint a tax matters representative, who shall be a general partner, member-manager or shareholder, and register that representative with the Tax Commissioner. To register the tax matters representative the tax entity must submit a Virginia Department of Taxation Form PTE with the commissioner of taxation. The form may be obtained from the Department of Taxation downloaded from the Department of Taxation web site or copied.

# Form PTE Virginia Pass-Through Credit Allocation

- Use this form to allocate a tax credit to the taxpayers listed in Section II.
- All businesses should be registered with the Virginia Department of Taxation before completing Form PTE. If you are not registered, complete Form R-1.
- The information in Section II may be submitted as an attachment provided that the attachment lists only the required information.
- Any pass-through listed in Section II must complete a separate Form PTE.
- Allocations must be shown in whole dollars and the total allocations listed in Section II must equal the amount shown in Section I, G.
- To avoid delays at the time of annual return processing, Form PTE should be filed within 30 days of certification, but at least 90 days prior to the participants (listed in Section II) filing their Income Tax Returns.
- Please ensure that the information provided on this form is accurate. Documentation will be required for any changes.

Mail Form to:  
**Virginia Department of Taxation**  
**Tax Credit Administration Unit**  
**PO Box 715**  
**Richmond, VA 23218-0715**  
 Or  
 Fax to: 804-786-2800  
 For Assistance, Call 804-786-2992

**You must attach a copy of your certificate. A separate Form PTE must be completed for each certificate.**

When an applicant agrees to carry out the approved BMP for the specified life span, the applicant is responsible regardless of changes in the control of the land. This includes the sale of the property as well as any change in farm lease arrangements. Maintenance agreements between the involved parties can be encouraged but ultimate responsibility still rests with the applicant. Districts should encourage landowner participation over tenant participation in their information and promotional campaigns.

A participant that fails to maintain the practice for the specified life span will be required to refund all or part of the tax credit amount. In the case of the death of the applicant this requirement may be waived. To waive the requirement of the lifespan of the practice in the case of a death requires an official action of the District Board that must be recorded in the minutes. The Board must notify the Department of Taxation and the Department of Conservation and Recreation in writing of this action, providing the year the tax credit was approved, as well as the Farm, Tract and Field Number, and DCR specification that the tax credit was authorized for.

### Documentation

For any practice receiving a tax credit, the District will require a signed landowner application and certification forms (DCR Cost Share Contract Form # 199-071 Parts 1, 2 & 3), a copy of a map showing field location and exact acreage, bills for all eligible practice components to determine total installation cost. Authorizing personnel will examine supporting data to determine eligible components and proper rates.

Districts will retain all billings and supporting data in their applicant files for a minimum of three years after the life span has expired. Districts must file their copy of all tax credit related forms by program year. Conservation plans and practice design sheets should be kept with individual case files according to cost-share program policy. Minimum document retention for authorized tax credit application forms will be three (3) years beyond the life span of the practice if the practice is installed. Canceled applications may be discarded after the initial (3) year period if not needed for future reference by the District.

### Data Reporting

In order to adequately track program effectiveness and to utilize implementation analysis for program management decisions, it is vital that all data requested be entered into the Ag BMP Tracking Program. The DCR central office staff maintains and updates the BMP tracking program to reflect changes in program data reporting for each program year. The Ag.BMP Tracking Program is used to track and report data associated to BMP implementation, analysis of completed BMP data provides valuable insight into program effectiveness. Therefore it is important that data entry be as accurate and consistently input as possible. Instructions for the data reporting of tax credit BMPs are the same as for cost-shared BMPs.

For computer records, the Agricultural BMP Tracking Program and database has been established on a remote server accessed through the Internet. The data files generated by SWCDs using the LOGI reporting software should be archived by the District and maintained as needed.

## Inspections and Spot Checks

All approved tax credit BMPs are subject to inspection for program compliance during the life span of the practice. Technical inspection and certification are the responsibility of designated technically responsible personnel (NRCS, District, DOF, and DCR). Random spot checks will be conducted annually by the District Conservation Specialist/Technician under the guidance of the Conservation District Coordinator to determine that the individual practice is still viable. A random 5% sample of each type practice will be spot-checked. In addition, a 5% sample of the total number of selected practices from previous years will be conducted to monitor long term compliance (excluding SL-8, SL-8B, SL-8H, and WQ-4).

Spot check report forms should be retained by the District and filed by program year. A copy of each spot check report should be made and forwarded to the Conservation District Coordinator and to any other agency providing cost-share for that project.

## Practice Failure

Practice failures or damage that results from other than weather related causes are not eligible for additional tax credit.

Practice maintenance is the responsibility of the applicant for the life span of the practice. Practices that are damaged or destroyed before certification are also the responsibility of the applicant and only the original authorized tax credit amount can be used to establish the practice.

Practice failures may occur due to unusual weather conditions, such as drought or severe storms that are beyond the control of the participant. If the practice has been certified and fails due to weather during the life span requirement, the participant may be entitled to additional tax credit in future sign-up periods. Re-application for practice failure can be authorized only once for the specific practice on the specified acreage (except where not eligible as stated in the practice specification). Re-applications will be subject to the life span requirement of the second application request.

Where ownership of the property has changed, the original applicant is still the individual responsible for the maintenance of the practice, and failing that, for the return of the tax credit directly to the Department of Taxation. The terms of any sales agreement lease agreement, or other transaction document for any property with a tax credit practice present should address this responsibility and be legally effective to transfer it to the new property owner/lessee. Upon the transfer of ownership or leasehold of the property, the original applicant must present to the SWCD either an executed copy of the, "Agricultural Best Management Practice Maintenance Agreement Transferring Responsibility for Best Management Practice" (see page IV-8 of this manual) transferring legal responsibility for maintenance of the practice to the new property owner/lessee or (2) a pro-rated return of tax credit funds directly to the Department of Taxation.

Commonwealth of Virginia  
 Agricultural Best Management Practice Maintenance  
 AGREEMENT TRANSFERRING RESPONSIBILITY FOR  
 BEST MANAGEMENT PRACTICE

This agreement is intended to designate the transfer of maintenance responsibility for a Best Management Practice that received cost-share or tax credit. The present participant (owner or manager) of the property has received funding from the Commonwealth of Virginia to implement a Best Management Practice on the below-referenced land unit. In return he/she has agreed to maintain the practice until \_\_\_\_\_. Completion of this agreement acknowledges assumption of this responsibility by the new participant, including the requirement to repay cost-share and tax credit received by the present participant if the BMP is not maintained according to state specifications.

The undersigned hereby certify that the present participant has transferred to the new participant his or her right and interest in the land unit described above. In consideration of this transfer of ownership or leasehold, it is hereby agreed:

1. The new participant hereby assumes the duties and obligations of the present participant under Contract No. \_\_\_\_\_ to maintain the above BMP for its lifespan in accordance with state specifications, and to refund all or part of the cost-share assistance or tax credit if the practice is found not to meet state specifications, or if the practice is removed or not properly maintained during its lifespan. The new participant agrees to allow SWCD personnel access to his property for the purpose of verifying maintenance of the BMP.
2. The \_\_\_\_\_ SWCD acknowledges the transfer of the maintenance responsibility. Any cost-sharing or assistance provided under this transfer agreement shall be in accordance with applicable program rules and regulations of the Virginia Agricultural BMP Manual.

DATE: \_\_\_\_\_

Participants found, at any time of year, to have practices not meeting specifications or practices that have been destroyed during the designated life span will be contacted by the District and informed of the nature of the deficiency and the repayment requirements if not corrected. This should initially be a verbal notice (with the date documented in a case file). Verbal notice should be followed with a written notice (by certified mail) within two weeks. This notice must indicate the observed nature of the problem and allow the individual the opportunity to respond within two weeks.

Participants may be given a maximum grace period of six months from date of the written notification for practice compliance. At the end of the grace period, the practice will be re-inspected. The District will notify participants found with practices still not in compliance in writing that repayment of tax credit is required.

The return of tax credit funds required will be calculated on a straight-line prorated basis. All or part of the tax credit funds may be returned based upon a straight-line pro-rata basis if appropriate. This should be calculated on a monthly basis. For Example: XYZ SWCD authorized a \$1,200 tax credit for a SL-6B BMP to Farmer Green on October 10, 2004. Tax credit program guidelines stipulate that the lifespan of the practice begins on January 1 of the calendar year following the issuance of the tax credit (see Glossary Page X – 4). This practice is spot checked in August of 2007 and it is discovered that the land was sold in June '07 for development and the practice has been destroyed.

The district should calculate the landowner's pro-rata share as follows:

- Installation date: Oct. 10, 2004
- Lifespan of practice: 10 Years- Jan 1, 2005 through Dec 31, 2014 = 120 months
- Spot Check Date: Aug. 2007
- Practice in Compliance: Jan 2005 through June 2007: 30 months
- Tax Credit to Landowner: \$1,200  
\$1,200 divided by 120 months = \$10/month
- Repayment Calculation: 120 months – 30 months = 90 months
- Landowner re-payment to the Department of Taxation: 90 months X \$10/mo = \$900.00

If a participant is requested to return a tax credit the SWCD will notify the Department of Taxation of the landowner's name, social security number, or tax ID number that the tax credit was issued to, the year that the tax credit was issued and the calculated re-payment amount. The SWCD will then direct the participant to send a check directly to the Virginia Department of Taxation, P. O. Box 715, Richmond, VA 23218-0715 with a letter identifying the participants name address, social security or tax identification number and year that the tax credit was utilized with a courtesy copy to the SWCD for verification.

In the case of the death of the applicant this requirement may be waived (this requires an official action of the District Board that must be recorded in the minutes; see Hardship process in the Agricultural BMP Cost-share Program Policies and Procedures Manual.

If appropriate in "hardship cases", the District board may make alternative recommendations for DCR's consideration. All requests for hardships shall be submitted in writing to the Agricultural Incentives Program Manager, and copied to the appropriate Conservation District Coordinator (CDC). When a District requests DCR's consideration of a hardship case, DCR will convene an ad hoc committee composed of at least; the regional CDC, the Agricultural Incentives Program Manager, and another CDC. The District may act as an advocate for the program participant or the participant may present his own case including documentation certifying the existence of a hardship that provides a clear reason why the participant should be relieved of his responsibility to repay the cost-shared amount requested by the

District. The ad hoc committee will render its decision whether or not to grant a hardship exemption in writing to the District citing its reasoning and referencing the documentation provided. Participants will have 60 days from the date of notification to refund to the Department of Taxation the tax credit funds. The local DCR Conservation District Coordinator (CDC) must be copied on all correspondence and kept informed of any related activities.

### Granting of the Tax Credit

Final approval of practices for tax credit is the responsibility of the local Soil and Water Conservation District Board of Directors. District Boards of Directors approve BMPs for tax credits based on the total estimated cost of the BMP before installation. If a calculation of twenty-five percent of the participants out of pocket expenditures is less than the Board approved estimated tax credit when the practice is certified as complete then no further Board action is required. If the requested tax credit amount is larger than the Board approved estimated tax credit, the Board must approve the increased tax credit amount as a separate action. SWCD Directors must vote on all actions taken and record the outcome in the minutes of the meeting that such action is approved.

After the practice has been completed and certified, the local District board must have approved the appropriate tax credit amount based on the original total estimated cost or total actual cost, whichever is less. Any tax credit amount granted above the amount approved prior to BMP installation, due to cost overruns above the total estimated cost, must be legitimate cost and must be approved by the District Board and recorded in the meeting minutes.

Districts must send the applicant an **AGRICULTURAL BEST MANAGEMENT PRACTICES TAX CREDIT CERTIFICATE** on district letterhead along with a signed copy of the VIRGINIA BMP INCENTIVES PROGRAMS CONTRACT Parts I, II and III.

The **AGRICULTURAL BEST MANAGEMENT PRACTICES TAX CREDIT CERTIFICATE** notification must follow the format of the example on page III - 11.

The applicant must use the **AGRICULTURAL BEST MANAGEMENT PRACTICES TAX CREDIT CERTIFICATE** and/or a copy of the certificate of completion for documentation when filing a tax return.

Neither the local Soil and Water Conservation District (SWCD) nor the Virginia Department of Conservation and Recreation (DCR) is providing tax advice; the program participant may wish to consult with an independent tax advisor regarding potential tax consequences.

## Questions

Questions concerning any aspect of the tax credit program that are not addressed in this manual should be directed to the appropriate DCR Conservation District Coordinator or Agricultural Incentives Program Manager.

## Other Agricultural Tax Credits

The General Assembly has authorized other tax credits to encourage the purchase and usage of certain agricultural equipment in support of soil and water conservation. The usage of these tax credits by an agricultural producer does not require issuance of a Tax Credit Certification Letter or approval of the equipment by the SWCD. SWCDs should approve appropriately written Nutrient Management Plans if required. As with any tax credit usage the taxpayer is ultimately responsible for determining that they are eligible to utilize the tax credit in compliance with instructions and regulations from the Virginia Department of Taxation. Excerpts from the Code of Virginia are provided below for reference only.

### Tax Credit for Purchase of Conservation Tillage Equipment

§ 58.1-334. Tax credit for purchase of conservation tillage equipment.

*This code section was amended for taxable years beginning on or after January 1, 2005 to read:*

- A. Any individual shall be allowed a credit against the tax imposed by § [58.1-320](#) of an amount equaling 25 percent of all expenditures made for the purchase and installation of conservation tillage equipment used in agricultural production by the purchaser. As used in this section the term "conservation tillage equipment" means a planter, drill, or other equipment used to reduce soil compaction commonly known as a "no-till" planter, drill, or other equipment used to reduce soil compaction including guidance systems to control traffic patterns that are designed to minimize disturbance of the soil in planting crops, including such planters, drills, or other equipment designed to reduce soil compaction which may be attached to equipment already owned by the taxpayer.
- B. The amount of such credit shall not exceed \$4,000 or the total amount of tax imposed by this chapter, whichever is less, in the year of purchase. If the amount of such credit exceeds the taxpayer's tax liability for such tax year, the amount that exceeds the tax liability may be carried over for credit against the income taxes of such individual in the next five taxable years until the total amount of the tax credit has been taken.
- C. For purposes of this section, the amount of any credit attributable to the purchase and installation of conservation tillage equipment by a partnership or electing small business corporation (S corporation) shall be allocated to the individual partners or shareholders in proportion to their ownership or interest in the partnership or S corporation.

## Tax Credit for Purchase of Precision Agricultural Equipment

§ 58.1-337. Tax credit for purchase of advanced technology pesticide and fertilizer application equipment.

A. Any individual engaged in agricultural production for market who has in place a nutrient management plan approved by the local Soil and Water Conservation District by the required tax return filing date of the individual shall be allowed a credit against the tax imposed by § [58.1-320](#) of an amount equaling twenty-five percent of all expenditures made by such individual for the purchase of equipment certified by the Virginia Soil and Water Conservation Board as providing more precise pesticide and fertilizer application. Virginia Polytechnic Institute and State University and Virginia State University shall provide at the request of the Virginia Soil and Water Conservation Board technical assistance in determining appropriate specifications for certified equipment, which would provide for more precise pesticide and fertilizer application to reduce the potential for adverse environmental impacts. The equipment shall be divided into the following categories:

1. Sprayers for pesticides and liquid fertilizers;
2. Pneumatic fertilizer applicators;
3. Monitors, computer regulators, and height adjustable booms for sprayers and liquid fertilizer applicators;
4. Manure applicators;
5. Tramline adapters; and
6. Starter fertilizer banding attachments for planters.

B. The amount of such credit shall not exceed \$3,750 or the total amount of the tax imposed by this chapter, whichever is less, in the year of purchase. If the amount of such credit exceeds the taxpayer's tax liability for such taxable year, the amount which exceeds the tax liability may be carried over for credit against the income taxes of such individual in the next five taxable years until the total amount of the tax credit has been taken.

C. For purposes of this section, the amount of any credit attributable to the purchase of equipment certified by the Virginia Soil and Water Conservation Board as providing more precise pesticide and fertilizer application by a partnership or electing small business corporation (S corporation) shall be allocated to the individual partners or shareholders in proportion to their ownership or interest in the partnership or S corporation.

### **Implementation Guidance from the July 17, 1996 Soil and Water Conservation Board meeting in a section entitled:**

“Equipment certification

It will be the responsibility of the purchaser to determine if the equipment can meet these specifications. The Virginia Soil and Water Conservation Board will not be producing an approved equipment list or reviewing each request. Nor is it the responsibility of the district or any other agency staff to determine or advise the purchaser if his equipment qualifies similarly it will be the responsibility of the individual to pursue the development of a nutrient management plan.”

DCR's guidance to Districts is that the SWCD is only required by code language to approve a nutrient management plan for the Precision Ag. Tax Credit.

WQ-10	Integrated Pest Management	No	Acres	N/A	N/A	Acres	Acres being scouted	1 year	SWCD
WQ-11	Agricultural Sinkhole Protection	Yes	Acres	X	X	Acres	Acreage protected around sinkhole and any area draining into the sinkhole	10 years	SWCD
			Av. Buffer Width						

\*If a CREP buffer is not planted but left to naturally re-generate based upon DOF recommendations, the number of acres of buffer should be reported. Revised March 2012

° No tax credit is available for CRFR-3 and CRSL-6 when 100% cost-share payment is provided by federal and state cost-share payments.
